Description of Matter:

By Resolution No. 13-022, approved on March 27, 2013, the Board approved a contract and initial work authorization for Jacobs Engineering to provide preliminary engineering and environmental services for the MoPac South Project. In August of 2014, the project scope and deliverable was revised for the proposed MoPac South Intersections Project from a “categorical exclusion” to an “environmental assessment.” This supplement provides for continuation of support of current activities and the inclusion of additional activities as a result of that scope revision. These activities include: alternatives development and evaluation, environmental studies, public involvement, preliminary engineering, field survey, hydraulic studies, and schematic development.
