# Economic Commentary

Despite expectations that the Federal Reserve's announcement to purchase an additional \$600 billion in Treasury securities over the next eight months would boost financial market asset prices, many markets, including Treasury securities, broad equity markets and many spread sectors, ended the month flat to lower in price. This may reflect in part some investors' lack of confidence in the efficacy of Fed purchases. However, the largest influence on risk markets has been resurgent concerns around peripheral Europe, with widespread skepticism that the European Central Bank's announced \$90 billion bailout for Ireland will forestall the need for further bailouts. Contagion fears continue to weigh on peripheral sovereign debt and some are forecasting the ECB will need to delay its withdrawal of emergency liquidity for banks. Also dragging on markets, China announced efforts to dampen its growth by increasing its banks' reserve requirements, which could signal further policy movements that would detract from developed countries' growth. Markets also continue to monitor geopolitical risks in Korea. In the U.S., income and consumption appear to be improving. While the mid-term elections and Fed asset purchases have created more clarity regarding the direction of future policy, questions remain about how to increase the solvency of many U.S. homeowners, how to reform nnie Mae and Freddie Mac, and how to best extend expiring tax cuts. Nevertheless, the risks of a significant fiscal drag from piring tax cuts in early 2011 have declined as some compromise is expected. The dissipation of these types of uncertainties has likely already benefited hiring and consumption. The baseline scenario is that economic growth will remain tepid, core CPI will remain at the low end of the Fed's comfort zone and that the unemployment rate is likely to remain elevated through 2011.

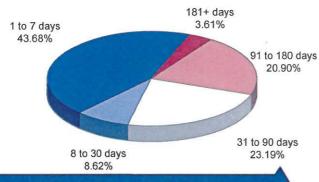

This information is an excerpt from an economic report dated November 2010 provided to TexSTAR by JP Morgan Asset Management, Inc., the investment manager of the TexSTAR pool.

Fed's actions will probably continue to be driven by the employment gap, the inflation gap and inflation expectations.

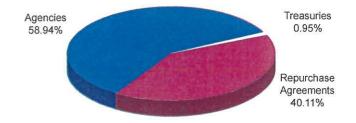

The Federal Reserve's asset purchase program is not likely to be conditional on a short period of improved economic data. The
