Economic Commentary

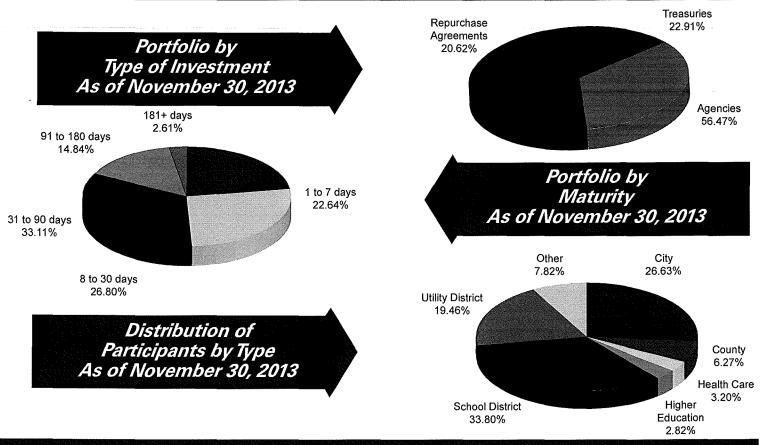

Most fixed income risk markets rose over the month and the Standard & Poor's 500 Index reached a new record high. Longerterm Treasury yields increased as stronger economic data led market participants to speculate that the Fed could begin reducing its asset purchase program as early as December. However, Janet Yellen's confirmation hearing before the Senate Banking Committee to become the Federal Reserve's first chairwoman reflected a continuation of accommodative policy going forward. She stated her preference to remove accommodation cautiously and that she still expects the first reduction in the pace of asset purchases to occur at the Fed's March meeting, likely accompanied by a strengthening of forward rate guidance. The minutes of the Fed's October meeting reaffirmed its view that growth is reviving as the negative effects from the government shutdown have been less than feared. Additionally, the Fed appears to be ready to shift away from asset purchases and towards a policy framework dependent on forward guidance. At the same time, investors seem to have become more comfortable with the Fed's "tapering isn't tightening" message.

With the return of regular economic data reporting this month, some sectors – e.g., labor markets – showed strength, while others, such as manufacturing, started to slow. Forward-looking indicators point to U.S. economic growth that is still too weak to support a self-sustaining recovery. Loan growth is decelerating, increasing downside risks for economic growth in the near future. Corporate profit growth remains lackluster. Momentum from the housing sector should decelerate, with housing less affordable now relative to earlier this year due to rising home prices and higher mortgage rates limiting the contribution of residential spending to GDP. The future trajectory of fiscal policy remains highly uncertain. A committee of Senators and Representatives is scheduled to present a budget deal in the next few weeks, because the current Continuing Resolution is set to expire in January 2014. The drag from fiscal cuts on economic growth is expected to be below that experienced in 2013. Income taxes are not expected to increase as much as last year; and, with the low base for gasoline prices, consumption could experience a moderate, although limited, boost. Early reports from Thanksgiving weekend retail sales indicate modest growth, but the shorter-than-usual holiday period means that consumers will need to accelerate spending to surpass last year's levels.
