#### GENERAL MEETING OF THE BOARD OF DIRECTORS OF THE CENTRAL TEXAS REGIONAL MOBILITY AUTHORITY

#### **RESOLUTION NO. 18-002**

#### ACCEPT THE FINANCIAL STATEMENTS FOR NOVEMBER 2017, DECEMBER 2017 AND JANUARY 2018

WHEREAS, the Central Texas Regional Mobility Authority ("Mobility Authority") is empowered to procure such goods and services as it deems necessary to assist with its operations and to study and develop potential transportation projects, and is responsible to insure accurate financial records are maintained using sound and acceptable financial practices; and

WHEREAS, close scrutiny of the Mobility Authority's expenditures for goods and services, including those related to project development, as well as close scrutiny of the Mobility Authority's financial condition and records is the responsibility of the Board and its designees through procedures the Board may implement from time to time; and

WHEREAS, the Board has adopted policies and procedures intended to provide strong fiscal oversight and which authorize the Executive Director, working with the Mobility Authority's Chief Financial Officer, to review invoices, approve disbursements, and prepare and maintain accurate financial records and reports;

WHEREAS, the Executive Director, working with the Chief Financial Officer, has reviewed and authorized the disbursements necessary for the month of November 2017, and has caused Financial Statements to be prepared and attached to this resolution as <u>Exhibit A</u>; and

WHEREAS, the Executive Director, working with the Chief Financial Officer, has reviewed and authorized the disbursements necessary for the month of December 2017, and has caused Financial Statements to be prepared and attached to this resolution as <u>Exhibit B</u>.

WHEREAS, the Executive Director, working with the Chief Financial Officer, has reviewed and authorized the disbursements necessary for the month of January 2018, and has caused Financial Statements to be prepared and attached to this resolution as <u>Exhibit C</u>.

NOW THEREFORE, BE IT RESOLVED, that the Board of Directors accepts the Financial Statements for November 2017, December 2017 and January 2018, attached hereto as <u>Exhibit A</u>, <u>Exhibit B</u>, and <u>Exhibit C</u> respectively.

Adopted by the Board of Directors of the Central Texas Regional Mobility Authority on the 28<sup>th</sup> day of February 2018.

#### Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

\* The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waived in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

# Holiday Reminder

In observance of the Christmas holiday, **TexSTAR will be closed Monday, December 25, 2017**. All ACH transactions initiated on Friday, December 22nd will settle on Tuesday, December 26th.

In observance of the New Year's Day holiday, **TexSTAR will be closed Monday, January 1, 2018**. All ACH transactions initiated on Friday, December 29th will settle on Tuesday, January 2nd.

Notification of any early transaction deadlines on the business day preceding the holiday will be sent by email to the primary contact on file for all TexSTAR participants. Please plan accordingly for your liquidity needs.

# **Economic Commentary**

Tax reform took center stage in November as both Houses of Congress worked expeditiously to pass their respective versions of the tax bill. A lower corporate tax rates would be positive for corporate earnings, which in turn could lift risk assets further. Skepticism that Republicans would be able to get a reconciled tax bill passed by the end of the year thwarted markets enthusiasm early in the month. Credit spreads widened and high yield corporates sold off. Investor sentiment shifted in the second half of the month with resumed optimism around the passage of tax reform. Equity markets rallied, reaching fresh highs, and Bitcoin climbed to an exuberant high. In line with expectations, OPEC and Russia agreed to extend production cuts until the end of 2018. Oil prices ended the month higher, with WTI crude at \$57/barrel.

In terms of the timing for the next federal funds rate increase, the committee has indicated that its objective is to continue to keep the pace of rate hikes "gradual". The median of the committee expects 1 additional rate hike in 2017 and 3 rate hikes in 2018. The market is pricing nearly a 100% probability of a rate hike by year-end. Financial conditions have continued to ease throughout the year allowing the Fed to raise rates without disrupting markets. President Trump has begun to make progress on staffing the Federal Reserve. Jerome Powell, a current Board of Governor, has been nominated to lead the Fed next year and Randal Quarles has started as the new Vice Chair of Supervision. However, the Vice Chair of the Board of Governors spot still needs to be filled as well as 3 other governor spots. Trump has recently announced the nomination of Marvin Goodfriend to the Board of Governors, although he has not yet been confirmed by the Senate. Given Trump's choice to appoint Powell, we expect little to change with regards to monetary policy in the near term as his nomination represents continuity between current and future policy plans.

This information is an excerpt from an economic report dated November 2017 provided to 12xSTAR by JP Morgan Asset Management, Inc., the investment manager of the TexSTAR pool.

#### Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

# **Economic Commentary**

U.S. Tax reform dominated most of the quarter as both Houses of Congress worked expeditiously to pass their respective versions of the tax bill. While expectations of passage had drifted lower as the year progressed, the GOP successfully passed a reconciled version of the bill which was signed into law in December. The highlights of the bill on the corporate side were lower tax rates for corporations and small business pass-throughs as well as changes to interest and capital investment deductibility. The highlights on the individual side were lower effective tax rates, higher standard deductions, offset by the removal of most state and local deductions. Fiscal policy has the potential to pro¬vide additional stimulus to an already strong economy. In addition, the government has passed legislation to extend government spending until January in order to give the congress more time to debate the 2018 fiscal budget (which began in September '17).

The Federal Reserve (Fed) raised rates by 25 bps to 1.25%-1.50% at its December Federal Open Market Committee (FOMC) meeting. The committee reiterated its positive assessment of the labor market and the U.S. economy. It also indicated that inflation was below its 2% target, but that the weakness appeared transitory. The committee expects 3 rate hikes in 2018, 2 in 2019 and slightly less than 2 in 2020. For now, our view remains consistent with the Fed's projections— growth will remain strong (despite the typical negative seasonali¬ty in the first quarter), inflation will stay contained and the Fed will remain on a gradual path towards normalized real yields by raising the fed funds rate three times. We believe that the yield on the U.S. 10-year Treasury will also rise modestly, ending 2018 at 2.75%–3.25%. If inflation does start coming in above target, we could easily see the Fed raise rates four times in 2018, not the three times the market is expecting. If both the European Central Bank and the Bank of Japan also start moving to higher rates at the same time that central bank balance sheet expan¬sion turns negative (currently projected for around October 2018), then bond investors are not being compensated for the risks, volatility will rise and the second half of 2018 could be much more difficult for the markets.

Despite strong growth, inflation has been stubbornly low. In the face of low inflation, the world's central banks seem content to turn a blind eye towards the potential risks of ultra-accommoda¬tive policy. Markets are going up and unemployment is going down. Inflation levels are caught in a tug-of-war between downward structural forces (technology improvements, price transparency) and upward cyclical forces (economic growth, tight labor mar¬kets), with the structural pressures continuing to deliver disappointments.

#### Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

## Economic Commentary

Momentum from the fourth quarter of 2017 continued into January as the much anticipated U.S. Tax Cuts and Jobs Act was passed and signed into law at the end of December. Risk assets extended their outperformance into 2018 and several U.S. Corporations announced plans to boost domestic capital investments on the back of the lower 21% Corporate tax rate, and the repatriation of cash trapped overseas. In Washington, the U.S. government was forced to shut down for three days. However, a continuing resolution was eventually passed to keep the government funded until February 8th. The shutdown had minimal impact on markets, which continued to perform well over the month.

The Federal Reserve (Fed) kept rates unchanged at its January Federal Open Market Committee (FOMC) meeting and maintained its positive assessment of the labor market and the U.S. economy. While inflation is still below the Fed's 2% target, investors expect a gradual increase this year, which could lead the Fed to raise rates four times, instead of three times. Probabilities of a March rate hike, as measured by Fed funds futures are almost 100%. Although the Fed delivered on its 3 rates hike over the past year, financial conditions have continued to ease. As a result, 3 to 4 rate hikes in 2018 are ostensibly achievable given expectations of further declines of the unemployment rate. Fiscal stimulus in the U.S. is an added tailwind which could skew the total number of rate hikes in 2018 higher.

The U.S. economy is starting 2018 with strong momentum. Financial conditions remain easy and should boost growth this year. A softer U.S. dollar should also continue to promote global demand and exports. Consumption continues to be a principal driver of the U.S. economy but growth has become more balanced as business investment, government spending and exports have also begun to contribute more substantially. The flattening bias of the Treasury yield curve reversed in January, with yields rising steadily across the curve. The two-year Treasury yield ended the month up 25 basis points (bps) at 2.14% and the five-year Treasury yield ended the month up 31bps at 2.52%.
