Economic Commentary

The risk asset rally continued into April as global equities continued soar, reaching new highs, and credit spreads tightened. Improvements in economic data combined with soft inflation prints bolstered the conviction that the cycle isn't quite over and alleviated near term recession fears. The Federal Reserve kept rates unchanged at 2.25%-2.50%, a move that was widening anticipated given rhetoric shift this year. Chair Powell emphasized that the committee does not see a strong case to move rates in either direction at this time. Tailwinds for growth are also building given the significant easing in financial conditions year to date as the Fed has turned to a neutral policy stance which should boost growth and help the housing market as well as other interest rate sensitive sectors. With the labor market moving increasingly tighter, we would expect gradual wage growth to continue and the pace to move higher above 3% as the year progresses. We also expect job growth to remain robust but the pace to slow gradually as the year progresses and the unemployment rate falls further.

Government spending is expected to continue to contribute positively to growth through the first half of 2019. This will occur in tandem with an increase in the budget deficit which is expected to be nearly \$1 trillion in 2019. The Treasury has already ramped up issuance sufficiently in 2018 to fund this gap so little additional increase is necessary. The FOMC has indicated a strong preference to keep the current Federal Funds rate range (at 2.25 – 2.5%) unchanged. We expect the Fed to remain comfortable with this stance for most if not all of 2019. While growth is expected to be above trend and wages to glide higher, core PCE will not rise significantly enough above 2% to put pressure on the Fed to tighten policy in 2019. The most likely outcome is for the policy rate to remain unchanged in 2019 however we do not expect the growth or employment backdrop to deteriorate such that rate cuts would be necessary. In order for the Fed to shift back to a hiking bias, the Committee would need to see significant evidence that inflation is rising above the 2% objective as well as continued robust job growth, rising wages and above-trend GDP. In addition, more clarity on the balance of risks will be needed. This will take time and more data to determine the trajectory for the global and U.S. economy.
