This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.
- (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

### Economic Commentary

In August, markets reacted to geopolitical tensions with North Korea, the terror attack in Spain, and Hurricane Harvey that hit the Gulf coast – home to many large U.S. oil refiners/producers. Investors piled into safe haven assets causing treasury yields to rally. Gold rallied and hit the year high of \$1,321/oz. Second quarter GDP was revised up from 2.6% to 3.0% while global growth expanded at the fastest pace in seven years and the growth backdrop in the U.S. continues to look solid in the second half of 2017. Business and consumer confidence remains elevated and in some cases has re-accelerated in the past few months. It would also suggest that if we do get any clarity on fiscal or tax policy, confidence could move even higher.

Government spending is unlikely to impact growth materially in 2017 as new legislation on spending and tax reform is not expected until fall, at the earliest. Before this legislation can move forward, the congress will need to agree on a resolution for the debt ceiling. We view the probability of a default as unlikely. The odds of a shutdown or debt ceiling breach look to have declined now that congress must find a way to pass legislation to provide funding for Hurricane Harvey victims. We do foresee some type of tax reform or relief to occur in late 2017 or early 2018 as well as a continued push towards deregulation once Randal Quarles is confirmed as the Vice Chair of Supervision at the Fed.

In terms of the timing for the next federal funds rate increase, the committee has indicated that their objective is to continue to keep the pace of rate hikes “gradual”. The median of the committee expects 1 additional rate hike in 2017 and 3 rate hikes in 2018. An additional rate hike in 2017 will be dependent on inflation data which has disappointed and kept the Fed cautious despite financial conditions remaining very easy. For 2017, the market’s expectation of an additional rate hike is waning and for 2018, the market is only pricing in about one and half rate hikes. Prior to the next rate hike, the committee appears very determined to start the balance sheet normalization process as soon as the September meeting. Looking beyond 2017, Presidential Trump has the ability to make big changes on the committee by filling two more open positions on the Board of Governors. Most important will be who takes over when Chair Yellen’s term is complete in February 2018.
