

**GENERAL MEETING OF THE BOARD OF DIRECTORS
OF THE
CENTRAL TEXAS REGIONAL MOBILITY AUTHORITY**

RESOLUTION NO. 24-024

**PROHIBITING THE OPERATION OF CERTAIN MOTOR VEHICLES
ON MOBILITY AUTHORITY TOLL FACILITIES PURSUANT TO
THE HABITUAL VIOLATOR PROGRAM**

WHEREAS, Transportation Code, Chapter 372, Subchapter C, authorizes toll project entities, including the Central Texas Regional Mobility Authority (Mobility Authority), to exercise various remedies against certain motorists with unpaid toll violations; and

WHEREAS, Transportation Code §372.106 provides that a “habitual violator” is a registered owner of a vehicle who a toll project entity determines:

(1) was issued at least two written notices of nonpayment that contained:

(A) in the aggregate, 100 or more events of nonpayment within a period of one year, not including events of nonpayment for which: (i) the registered owner has provided to the toll project entity information establishing that the vehicle was subject to a lease at the time of nonpayment, as provided by applicable toll project entity law; or (ii) a defense of theft at the time of the nonpayment has been established as provided by applicable toll project entity law; and

(B) a warning that the failure to pay the amounts specified in the notices may result in the toll project entity’s exercise of habitual violator remedies; and

(2) has not paid in full the total amount due for tolls and administrative fees under those notices; and

WHEREAS, the Mobility Authority previously determined that the individuals listed in Exhibit A are habitual violators, and these determinations are now considered final in accordance with Transportation Code, Chapter 372, Subchapter C; and

WHEREAS, Transportation Code §372.109 provides that a final determination that a person is a habitual violator remains in effect until (1) the total amount due for the person’s tolls and administrative fees is paid; or (2) the toll project entity, in its sole discretion, determines that the amount has been otherwise addressed; and

WHEREAS, Transportation Code §372.110 provides that a toll project entity, by order of its governing body, may prohibit the operation of a motor vehicle on a toll project of the entity if:

(1) the registered owner of the vehicle has been finally determined to be a habitual violator; and

(2) the toll project entity has provided notice of the prohibition order to the registered owner; and

WHEREAS, the Executive Director recommends that the Board prohibit the operation of the motor vehicles listed in Exhibit A on the Mobility Authority's toll roads, including (1) 183A Toll; (2) 290 Toll; (3) 71 Toll; (4) MoPac Express Lanes; (5) 45SW Toll; and (6) 183 Toll.

NOW THEREFORE, BE IT RESOLVED that the motor vehicles listed in Exhibit A are prohibited from operation on the Mobility Authority's toll roads, effective May 29, 2024; and

BE IT FURTHER RESOLVED that the Mobility Authority shall provide notice of this resolution to the individuals listed in Exhibit A, as required by Transportation Code §372.110; and

BE IT IS FURTHER RESOLVED that the prohibition shall remain in effect for the motor vehicles listed in Exhibit A until the respective habitual violator determinations are terminated, as provided by Transportation Code §372.110.

Adopted by the Board of Directors of the Central Texas Regional Mobility Authority on the 29th day of May 2024.

Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

ECONOMIC COMMENTARY

Market review

March inflation data ignited angst for markets. While we received stickier January and February inflation, hotter than expected inflation prints for March raised questions about whether the path to the 2% target is still encountering “bumps” along the road, or a more problematic trend higher. Resilient consumers, bolstered by the unwavering strength in labor markets, continued to spend, despite higher prices and interest rates. As the month progressed, strong growth, tight labor markets, and stubborn inflation eroded market expectations for rate cuts to begin in June while Federal Reserve (Fed) members indicated that rates may remain high for longer. The U.S. economy grew at a 1.6% seasonally adjusted annualized rate in the first quarter, falling short of expectations for 2.5% growth. However, volatile components like trade and inventories, which often swing up and down in consecutive quarters, significantly impacted this slowdown. Excluding those components, the economy grew at a healthy 3.1% rate — slightly above last year’s average. Consumer spending rose 2.5% as spending on services more than offset a decline in goods spending. This growth was supported by a healthy labor market. The March employment report provided fresh evidence of this momentum. Nonfarm payrolls rose by an impressive 303,000, handily beating expectations, while revisions to the prior two months added another 22,000 in jobs. Most sectors added jobs this month, with the most outsized gains seen in government and health care. In the household survey, the labor force increased by 469,000, and the unemployment rate ticked down to 3.8%.

ECONOMIC COMMENTARY (cont.)

Despite this strength, imbalances between labor supply and demand have eased. According to the Job Openings and Labor Turnover Survey, the number of job openings declined from 8.8 million in February to 8.5 million in March. Elsewhere, wage growth rose to 0.3% m/m and moderated to 4.1% year-over-year (y/y). The March CPI report came in stronger than expected, with many of the usual suspects driving the bulk of this strength. Headline CPI rose 0.4% m/m and 3.5% y/y, its fastest annual increase since September 2023, while core CPI rose 0.4% m/m and 3.8% y/y. Core services remained problematic, specifically shelter and auto insurance, up 0.4% m/m and 2.6% m/m, respectively. Energy prices rose for a second consecutive month, while food inflation remained relatively benign. Elsewhere, lower vehicle prices offset a spike in apparel prices, allowing core goods disinflation to continue. Similarly, the headline and core Personal Consumption Expenditures Price Index (PCE) rose by a hotter than expected 2.7% and 2.8% y/y, respectively.

At its May 1st meeting, the Federal Open Market Committee (FOMC) voted to leave the federal funds rate unchanged at a target range of 5.25%-5.50% for a sixth consecutive meeting. The statement added a new sentence that acknowledged the recent stalling in the broad disinflationary trend, but also maintained the language stating the Committee does not anticipate it will cut rates until it is confident inflation is headed towards 2%. Elsewhere in the statement, the Federal Reserve (Fed) noted that it will slow the pace of quantitative tightening (QT) beginning in June by reducing the monthly redemption cap on Treasury securities from \$60bn to \$25bn and maintaining the \$35bn cap on agency mortgage-backed securities (MBS), though it did not state when QT would end. The Committee will reinvest securities maturing in excess of these caps into U.S. Treasuries.

This statement was not much of a surprise to investors as recent Fed speech had acknowledged the lack of progress on inflation and the desire to maintain the current level of policy rates for longer. As such, Treasury yields increased. The three-month Treasury bill yield modestly rose 3 basis points (bps) to end the month at 5.40%, and the six-month Treasury bill yield rose 8 bps to 5.40%. One- and two-year Treasury yields increased more significantly, up 21 bps and 42 bps to 5.24% and 5.04%, respectively.

Outlook

Having started 2024 with the market pricing almost seven quarter-point policy rate cuts from the Fed this year, expectations are now for significantly fewer cuts, with some talk that there may not be any cuts at all. The “last mile” of disinflation has proven to be the hardest. CPI inflation has been accelerating recently, with core PCE inflation up in 1Q24, and the Employment Cost Index (ECI) climbing a stronger-than-expected 1.2% — its largest gain in a year. While inflation has come down significantly from its highs in 2022, there are tentative signs that it is not falling fast enough to allow the Fed to cut rates as soon, or by as much, as they had initially indicated in the Summary of Economic Projections provided in March. However, it appears the FOMC continues to believe the current level of policy rates is restrictive, as evidenced by the moderation in labor demand, making the potential for further rate hikes unlikely.

That said, given the underlying strength in consumption and the relative tightness of labor markets, we anticipate that the Fed is likely to hold the policy rate on pause until they are confident that inflation is back on track to the 2% target. It seems clear that the FOMC remains biased to eventually cut rates, but the timing and cadence of policy easing will be determined by how inflation develops over the next few months. We now believe there may be only one rate cut this year, most likely after the presidential election. We expect economic growth to continue to moderate from the robust pace experienced last year, setting the stage for a soft landing.
