

**GENERAL MEETING OF THE BOARD OF DIRECTORS  
OF THE  
CENTRAL TEXAS REGIONAL MOBILITY AUTHORITY**

**RESOLUTION NO. 24-073**

**PROHIBITING THE OPERATION OF CERTAIN MOTOR VEHICLES  
ON MOBILITY AUTHORITY TOLL FACILITIES PURSUANT TO  
THE HABITUAL VIOLATOR PROGRAM**

WHEREAS, Transportation Code, Chapter 372, Subchapter C, authorizes toll project entities, including the Central Texas Regional Mobility Authority (Mobility Authority), to exercise various remedies against certain motorists with unpaid toll violations; and

WHEREAS, Transportation Code §372.106 provides that a “habitual violator” is a registered owner of a vehicle who a toll project entity determines:

(1) was issued at least two written notices of nonpayment that contained:

(A) in the aggregate, 100 or more events of nonpayment within a period of one year, not including events of nonpayment for which: (i) the registered owner has provided to the toll project entity information establishing that the vehicle was subject to a lease at the time of nonpayment, as provided by applicable toll project entity law; or (ii) a defense of theft at the time of the nonpayment has been established as provided by applicable toll project entity law; and

(B) a warning that the failure to pay the amounts specified in the notices may result in the toll project entity’s exercise of habitual violator remedies; and

(2) has not paid in full the total amount due for tolls and administrative fees under those notices; and

WHEREAS, the Mobility Authority previously determined that the individuals listed in Exhibit A are habitual violators, and these determinations are now considered final in accordance with Transportation Code, Chapter 372, Subchapter C; and

WHEREAS, Transportation Code §372.109 provides that a final determination that a person is a habitual violator remains in effect until (1) the total amount due for the person’s tolls and administrative fees is paid; or (2) the toll project entity, in its sole discretion, determines that the amount has been otherwise addressed; and

WHEREAS, Transportation Code §372.110 provides that a toll project entity, by order of its governing body, may prohibit the operation of a motor vehicle on a toll project of the entity if:

(1) the registered owner of the vehicle has been finally determined to be a habitual violator; and

(2) the toll project entity has provided notice of the prohibition order to the registered owner; and

WHEREAS, the Executive Director recommends that the Board prohibit the operation of the motor vehicles listed in Exhibit A on the Mobility Authority's toll roads, including (1) 183A Toll; (2) 290 Toll; (3) 71 Toll; (4) MoPac Express Lanes; (5) 45SW Toll; and (6) 183 Toll.

NOW THEREFORE, BE IT RESOLVED that the motor vehicles listed in Exhibit A are prohibited from operation on the Mobility Authority's toll roads, effective November 20, 2024; and

BE IT FURTHER RESOLVED that the Mobility Authority shall provide notice of this resolution to the individuals listed in Exhibit A, as required by Transportation Code §372.110; and

BE IT IS FURTHER RESOLVED that the prohibition shall remain in effect for the motor vehicles listed in Exhibit A until the respective habitual violator determinations are terminated, as provided by Transportation Code §372.110.

Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.  
 (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

**ECONOMIC COMMENTARY**

**Market review**

In October, the economic landscape was characterized by a delicate equilibrium. We observed robust economic growth, stable unemployment rates, and resilient corporate profits, all of which contributed to what many are calling a “soft landing” for the economy. As inflation continues its gradual decline, the Federal Reserve (Fed) is expected to maintain a cautious approach to easing monetary policy, aiming to further stabilize economic conditions. The economy grew at a healthy 2.8% annualized rate, marking the second consecutive quarter of above-trend growth this year. Consumer spending remained a key driver, rising 3.7%, while government spending also showed strength. Business investment saw a modest rise of 0.3%, though residential investment was a notable weak spot. Anticipating potential disruptions from the port workers’ strikes in late September, businesses likely accelerated inventory accumulation, leading to an 11.9% surge in imports, which in turn dampened overall growth figures. Despite initial concerns about the labor market at the beginning of the third quarter, economic momentum has remained robust.

The September jobs report helped alleviate recent concerns about the labor market’s health. The unemployment rate fell from 4.22% to 4.05%, reflecting a robust increase in employment as measured by the household survey. The establishment survey for September revealed higher-than-expected job gains of 254,000, easing fears of a sharp slowdown in the labor market. Additionally, upward revisions added 72,000 jobs to the prior two months’ figures.

## *ECONOMIC COMMENTARY (cont.)*

In contrast to September's strong payroll numbers, the October payroll report delivered a significant downside surprise, with the headline figure at just 12,000, far below the anticipated 100,000. Moreover, the previous two months were revised downward by 112,000. Strikes and hurricanes likely skewed the headline figure, with private payrolls declining by 28,000. Job demand also softened in September, as the Job Openings and Labor Turnover Survey indicated a decline in job openings to 7.4 million. Despite these challenges, the unemployment rate remained steady at 4.1%, though the unrounded measure showed a slight uptick to 4.14% over the month. Additionally, wages grew 4.0% year-over-year (y/y), marking the 18th consecutive month in which wage growth outpaced inflation. While October's payrolls were weaker than expected, the report was largely distorted, and the broader economic data suggests that the labor market, though cooling, remains solid. The September Consumer Price Index (CPI) report came in slightly hotter than expected, although inflation continued its steady downward trajectory. Headline inflation rose 0.2% month-over-month (m/m) and 2.4% y/y, marking the slowest annual increase since early 2021, while core inflation increased by 0.3% m/m and 3.3% y/y. Within the details, food prices rose by 0.4% m/m, the fastest pace since early 2023, partially offset by lower energy prices due to sharp declines in gasoline and fuel oils. Shelter inflation came in below expectations, easing to 0.2% m/m. Similarly, core Personal Consumption Expenditures (PCE) slightly exceeded expectations at 2.65% versus the anticipated 2.60%, while headline PCE met expectations at 2.1%. Overall, while inflation may experience some fluctuations, it remains on a well-defined, predictable downward path.

As the September jobs report exceeded expectations and GDP growth indicated a healthy economic pace, the case for more aggressive Federal Reserve rate cuts weakened throughout the month. Additionally, as the U.S. presidential election approached, rate volatility increased. Consequently, Treasury yields, particularly those beyond six months to maturity, course-corrected from the previous month's significant decline and rose considerably. Three-month Treasury bill yields declined by 8 basis points (bps) to 4.55%, while six-month Treasury bill yields increased by 5 bps to 4.46%. Longer-term Treasury yields rose more sharply, with one-year Treasury yields climbing by 26 bps to 4.27% and two-year Treasury yields increasing by 53 bps to 4.17%.

## **Outlook**

Across nearly every major indicator of economic health, the economy appears to be in excellent condition. Real GDP is demonstrating solid growth, inflation is nearing the Fed's 2% target, and job growth has been robust, with the unemployment rate remaining below 4.5% for the past three years. However, the current economic landscape is not without its risks. As the Fed continues to lower interest rates, there is potential for inflation to reaccelerate. Conversely, with interest rates still relatively high, there is a risk that labor markets could weaken further. Additionally, the upcoming U.S. presidential election and heightened geopolitical tensions add uncertainty to the economic outlook.

Despite these challenges, the Fed seems inclined to continue reducing the still-restrictive policy rate. Barring any significant economic shocks, the most likely course for the Fed is to adhere to the forecasts (the 'dots') outlined in the September Summary of Economic Projections. This suggests the Fed will likely implement an additional 50 bps of rate cuts this year, with a 25 bp cut anticipated in both November and December. Looking ahead to next year, the Fed is expected to proceed with three to four more 25 bp rate cuts, although the precise timing and pace will be closely tied to the unfolding economic data.

Wire rough-in phase is planned in conjunction with electrical rough in and walls at the one-sided phase. Rough in will take one week. Installation, commissioning and trim out begins as paint is drying and furniture is being installed. Walls go up in a week and are in a parallel process as racks are bought on site, cable is terminated, labeled and qualified. The project plan includes timelines associated with all other software and hardware integration for camera system tie-in, environmental monitoring and cutting over services from existing locations. The entire project plan is laid out in a Gantt chart format and covered in weekly OAC meetings.

Pricing for implementation will follow the Mobility Authority's cooperative agreement buying programs. FMS will provide work based on DIR open-ended PO-based consulting, specific project pricing, module pricing, straight labor pricing, manufacturer discount off MSRP pricing, support agreement pricing and other models that best accommodate different phases of the project and needs through the lifecycle of the systems.

Should the Mobility Authority decide to purchase directly from FMS, FMS will honor DIR pricing models for all current and future purchases of products and services, allowing for the same discount model for new, unlisted products.
