

Project Development Process

This project's anticipated NEPA environmental classification meets the Categorical Exclusion (CE) criteria, which is generally defined as an action that does not have a significant effect on the human environment. This was determined based on coordination with TxDOT and a preliminary analysis of resources to further understand the effects on both the environment and community.

Identify and monitor a significant rise in traffic flow

Propose Addition of an Extra Lane Discuss future capacity needs with the Capital Area Metropolitan Planning Organization (CAMPO), and include project in regional plan if concurrence is found

Undertake Environmental Study

Categorical

Exclusion

Determination

Conduct required environmental analysis and technical studies to support NEPA compliance and federal/state regulations/permit requirements

Obtain a Categorical Exclusion Determination which documents NEPA Clearance and ensures the project will comply with federal and state regulations
