MEETING OF THE BOARD OF DIRECTORS OF THE CENTRAL TEXAS REGIONAL MOBILITY AUTHORITY

RESOLUTION NO. 23-026

ACCEPT THE UNAUDITED FINANCIAL STATEMENTS FOR JUNE 2023

WHEREAS, the Central Texas Regional Mobility Authority (Mobility Authority) is empowered to procure such goods and services as it deems necessary to assist with its operations and to study and develop potential transportation projects, and is responsible to insure accurate financial records are maintained using sound and acceptable financial practices; and

WHEREAS, close scrutiny of the Mobility Authority's expenditures for goods and services, including those related to project development, as well as close scrutiny of the Mobility Authority's financial condition and records is the responsibility of the Board and its designees through procedures the Board may implement from time to time; and

WHEREAS, the Board has adopted policies and procedures intended to provide strong fiscal oversight and which authorize the Executive Director, working with the Mobility Authority's Chief Financial Officer, to review invoices, approve disbursements, and prepare and maintain accurate financial records and reports; and

WHEREAS, the Executive Director, working with the Chief Financial Officer, has reviewed and authorized the disbursements necessary for the month of June 2023 and has caused financial statements to be prepared and attached to this resolution as <u>Exhibit A</u>; and

NOW THEREFORE, BE IT RESOLVED, that the Board of Directors accepts the unaudited financial statements for June 2023, attached hereto as Exhibit A.

Adopted by the Board of Directors of the Central Texas Regional Mobility Authority on the 16th day of August 2023.

Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waved in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

NEW PARTICIPANTS

We would like to welcome the following entities who joined the TexSTAR program in June:

* Waller County Municipal Utility District No 37

ECONOMIC COMMENTARY

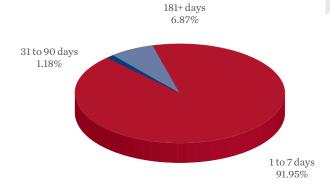

Market review

In the first days of June, Congress approved a last-minute compromise to increase the debt limit, ensuring the government's ability to meet its financial obligations and averting a crisis. With the debt ceiling political drama in the rear-view mirror, markets focused their attention on economic data and Federal Reserve (Fed) monetary policy. After 10 consecutive rate hikes totaling 500 basis points (bps), the Fed decided it was time to pause and evaluate whether the much-discussed long and variable lags of tighter monetary conditions were starting to bite and further slow growth and inflationary pressures. The U.S. economy proved to be more resilient than expected in the first half of 2023, despite the drag from significant rate hikes and the failures of a few U.S. regional banks, which caused concerns about a broader banking crisis toward the end of the first quarter. While the tightening cycle has weighed on growth, the timing of the long anticipated recession still remains uncertain as low unemployment and strong consumer and corporate balance sheets have extended the economic expansion. Resilience across the US labor market has been perhaps the most confounding aspect of the current cycle. The economy continued to see extraordinary excess demand for labor as seen in the Job Openings and Labor Turnover Survey (JOLTS) data, which showed job openings in April rising from an upwardly revised 9.7 million to 10.1 million and layoffs declining from 1.76 million to 1.495 million. On the other hand, voluntary quits declined from 3.63 million to 3.59 million – the lowest level since March 2021. The ratio of job openings to unemployed rose from 1.7 to 1.8. The peak was 2.0 in March 2022. While initial jobless claims appeared to have bottomed in mid-June, jumping to 265K from 233K at the end of May, initial claims declined to 239k in the week ending June 24th, the lowest level in a month. Additionally, payrolls growth continued to clock in well above-average (283k over the last three months as of May).

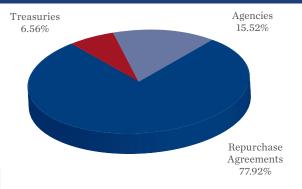

For the first time since January 2022, the Federal Open Market Committee (FOMC) voted to leave the federal funds rate unchanged at a range of 5.00%-5.25% at its June meeting. While this pause was largely expected, the statement language and press conference commentary were decisively hawkish, indicating that another increase is to be expected. The updated Summary of Economic Projections and dot plot were also surprisingly hawkish, suggesting this was simply a mid-year skip, rather than a prolonged pause. In fact, the median FOMC member now anticipates two more hikes this year followed by rate cuts sometime in 2024. While we do not think further tightening is necessary, the Fed made it clear that they still need more compelling evidence that inflation is swiftly decelerating. (continued page 4)

Market value of collateral supporting the Repurchase Agreements is at least 102% of the Book Value. The portfolio is managed by J.P. Morgan Chase & Co. and the assets are safekept in a separate custodial account at the Federal Reserve Bank in the name of TexSTAR. The only source of payment to the Participants are the assets of TexSTAR. There is no secondary source of payment for the pool such as insurance or guarantee. Should you require a copy of the portfolio, please contact TexSTAR Participant Services.

TEXSTAR VERSUS 90-DAY TREASURY BILL

This material is for information purposes only. This information does not represent an offer to buy or sell a security. The above rate information is obtained from sources that are believed to be reliable; however, its accuracy or completeness may be subject to change. The TexSTAR management fee may be waived in full or in part at the discretion of the TexSTAR co-administrators and the TexSTAR rate for the period shown reflects waiver of fees. This table represents historical investment performance/return to the customer, net of fees, and is not an indication of future performance. An investment in the security is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the issue seeks to preserve the value of an investment of \$1.00 per share, it is possible to lose money by investing in the security. Information about these and other program details are in the fund's Information Statement which should be read carefully before investing. The yield on the 90-Day Treasury Bill ("T-Bill Yield") is shown for comparative purposes only. When comparing the investment returns of the TexSTAR pool to the T-Bill Yield is taken from Bloomberg Finance L.P. and represents the daily closing yield on the then current 90-Day T-Bill. The TexSTAR yield is calculated in accordance with regulations governing the registration of openend management investment companies under the Investment Company Act of 1940 as promulgated from time to time by the federal Securities and Exchange Commission.

ECONOMIC COMMENTARY (cont.)

Meanwhile, inflation continued to decline, although perhaps not as quickly as the Fed had hoped. Headline CPI rose by 0.1% monthover-month (m/m) and 4.0% year-over-year (y/y), its lowest level since March 2021. Core CPI held steady, rising by 0.4% m/m for a third consecutive month, and 5.3% y/y. Gasoline and electricity prices fell by 5.6% and 18.5% m/m, respectively, which helped ease headline inflation, while stickiness in shelter, used cars and transportation services kept core inflation firm. However, the recent decline in the Manheim Used Vehicle Index suggests that used car prices should ease in the coming months. Similarly, headline PCE inflation was up 0.1% in May and 3.8% over a year ago, the lowest since April 2021 but still almost twice the Fed's target. Meanwhile core PCE looked firm at 0.3% m/m and 4.6% y/y, not much different from December's print. Treasury yields rose as a more resilient economy and labor market increasingly suggested the Fed will maintain its restrictive policy for longer. Two-year Treasury yields increased the most, climbing 86 bps during the quarter and 50 bps during the month, to end June at 4.90%. Short Treasury bill yields, while increasing on the quarter, actually declined in June. Three-month T-bill yields rose by 55 bps during the quarter but decreased by 10 bps to 5.30%. Six-month T-bill yields also increased 55 bps during the quarter and decreased by 1 bp in June to end at 5.43%.

Outlook

The U.S. economy remained resilient in the first half of 2023, widening the runway for a potential soft-landing. However, except for labor market levels, economic momentum is still slowing, with many leading indicators in recessionary territory, such as the Institute for Supply Management (ISM) manufacturing index, the Conference Board, University of Michigan consumer sentiment index, and National Federation of Independent Businesses (NFIB) loan availability. Despite the volume of rate hikes that the Fed has engineered, job growth is still firm, core inflation remains sticky, and the Fed is intent on raising rates even higher. It does not seem to matter that the Treasury yield curve has been inverted for multiple quarters, recession models are flashing red, and input costs are plunging. The Fed has reiterated that success cannot be declared until core inflation is at 2%—which seems distant. It appears the consumer is continuing to drive the U.S. economy. Unemployment remains low, and consumer excess savings are still above 2019 levels in aggregate. Furthermore, the housing market has stopped weakening, suggesting that the consumer remains resilient.

While we cannot dismiss the delayed impact of monetary tightening, we can take the Fed at its word that they are committed to bringing inflation down to 2%. We are skeptical that inflation can be brought back to target without a recession, but that does not seem imminent. We believe recession is likely to occur sometime in 2024. Although the Fed typically cuts rates before the start of a recession, that may not be the case this time. Like the 1981 experience, with inflation high and the Fed's credibility threatened, policymakers may wait until recession is clearly in the cards before having conviction that inflation is under control and rates can be brought down.

The common denominator of all previous recessions has been the removal of an overabundance of cheap funding. Given the overwhelming fiscal and monetary policy response to COVID-19, the removal of abundant, cheap liquidity is simply taking longer than we had anticipated. The rate of change in a slowdown is there, but the overall level of activity is still too high. With the Fed's revised dot plot indicating two more rate hikes before the end of the year, the risk that a policy error triggers a recession is looming on the horizon. During a panel hosted by the European Central Bank for a forum in Portugal in late June, Chair Powell reiterated that the Fed expects to raise rates further this year to curb sticky inflation and cool the strong labor market. He also said that he would not rule out hiking at consecutive meetings. Consequently, a 25 bp hike in July appears to be likely.
